

SIGNAL TOWERS

BR 50

- **Ultra bright and super slim** – Excellent perceptibility and slim design (ø 54 mm).
- **Signaling mode determinable by LED** – Replaceable LEDs determine the signaling mode (continuous or blinking light). The standard modules are already equipped with continuous light LEDs.
- **Individual configuration** – Up to 5 modules can be combined at any time. In addition to various LED light modules, Xenon flashing light modules, or an audible module can also be installed.
- **Flexible design options** – Fully Coloured or Crystal-Clear modules with coloured LEDs - the choice is yours. Assemble your individual signal tower according to your needs and design ideas.
- **Versatile mounting options** – Can either be mounted by tubular stand with plinth, tube, mounting bracket or directly - even with ready-made M12 connector available (see mounting equipment)
- **Universally applicable** – Usable indoors and outdoors.
- **Function-monitored** – Separate LED module for more safety in sensitive applications where a signal must be sent to an external safety system, operating station or control centre in the event of a malfunction.
- **Fieldbus connection** – Easy integration into an AS-Interface bus system is possible with a separate module.
